Dale Trust Develops Innovative Fund for Africa's Corporate Sector

Giles Brake - 31 October 2010

Firm develops offshore product range beyond Mauritian trusts and companies

MSI Global Alliance's offshore services member **Dale International Trust Company** continues to evolve its range of innovative products and services and has now launched an open ended fund for COMESA (Common Market for Eastern and Southern Africa). This widens the firm's focus beyond high net worth individuals looking to establish trusts and companies for private use.

The launch follows a sustained and proactive marketing campaign focused mainly on sub Saharan Africa, and has ensured the corporate sector in the African region is now much more aware of the services the firm can offer.

Raj Gopaul, the CEO of **Dale International Trust Company** comments: "The fund took only two weeks to be approved by the Financial Services Commission. Dale Trust now has the necessary expertise to establish funds (in addition to its normal activity of establishing Trusts and Companies) in Mauritius and we believe that brings more substance to the activities carried out in the offshore sector in Mauritius.

"Mauritius wants to be a platform for funds to be listed on the official market, and we believe that this will be an easier task following the Mauritius Financial Services Commission being recently recognised as the "Most Innovative Capital Market Regulator of The Year" by Africa Investor in collaboration with New York Stock Exchange (NYSE) Euronext.
